

For Immediate Release

EstateDigitalLockbox Earns VERAIFIED Security Mark from Veracode

*EstateDigitalLockbox Meets Industry
Standard for Security Quality and Reliability*

Burlington, Mass. - July 6, 2010 - Veracode, Inc. (www.veracode.com), provider of the world's leading cloud-based application risk management services platform, today announced that the EstateDigitalLockbox has completed the Veracode security verification process and achieved the VERAIFIED™ security mark (www.veracode.com/directory/verified-logo-program.html) for its mission-critical software application. This mark of security quality demonstrates to clients and users of the EstateDigitalLockbox that it has met or exceeded industry standards for security and reliability.

“The EstateDigitalLockbox provides convenient storage and retrieval of copies of critical documents such as wills trusts, real estate titles, health and financial records. As an industry, it is imperative that the security of online document storage products be independently verified. We are pleased to have earned the VERAIFIED mark for security quality and reliability. Our clients know they have an application they can trust,” said Hank Carabelli, Co-Founder of MyEstateManager LLC, creator of the EstateDigitalLockbox.

The EstateDigitalLockbox application has been added to the VerAfied software directory and is considered a high-impact application. The EstateDigitalLockbox allows clients to securely manage, organize and share documents anytime from anywhere with a computer and an Internet connection. With its many templates for organizing information, it also serves as a complete resource for estate administration.

Through its application risk management services platform, SecurityReview®, Veracode analyzes key application security risks including the most prevalent vulnerabilities, the absence and presence of security features (e.g. encryption) and backdoors in third-party software that may lead to insider fraud and cyber-threats. By submitting its applications to a rigorous independent testing using Veracode's automated static binary analysis and automated dynamic web vulnerability scanning, and resolving all identified severity five and severity four vulnerabilities as based on the Common Vulnerability Scoring System, EstateDigitalLockbox has utilized the most widely accepted and comprehensive methods available to secure its software.

“Anyone who uses software wants to know if due care was taken to create a secure application,” said Roger Oberg, SVP marketing, Veracode. “By earning and displaying the VERAIFIED mark prominently, MyEstateManager, LLC has clearly demonstrated its commitment to put customer concerns first.”

About MyEstateManager LLC

MyEstateManager LLC was founded in 2009 to offer peace of mind during one of life's most traumatic transitions - managing an estate when someone dies. EstateDigitalLockbox is part of the proprietary, private label platform known as EstateManger**PRO**, delivering personalized estate administration, education and resources for the clients of 'Trusted Advisors' including financial planners, financial advisors, hospices, estate planners and estate attorneys. EstateManager**PRO** provides a comprehensive roadmap to better navigate the complexities of estate administration including extensive planning tools, checklists, timelines and featured trusted service professionals. The software is a turnkey, cloud based application that simply appends to an existing website, maintaining the brand and "look and feel" of the Trusted Advisors' website. For more information visit www.estatemanagerPRO.com or call (720) 524-4307.

About Veracode

Veracode is the world's leader in cloud-based application risk management. With patented binary code analysis, dynamic Web assessments and developer e-learning, Veracode SecurityReview® (www.veracode.com/solutions/securityreview-editions.html) is the most accurate and cost-effective way to independently verify application security in both internally developed applications and third-party software without requiring source code or expensive tools. Veracode provides the most simple, complete way to implement security best practices, reduce operational cost and comply with internal security policies or external standards such as OWASP Top 10, CWE/SANS Top 25 and PCI. Veracode works with global organizations across multiple vertical industries including Barclays PLC, California Public Employees' Retirement System (CalPERS), Computershare and the Federal Aviation Administration (FAA).
